**A**N unusually full and fresh treatment of this subject. The author is not content to give the usual cut-and-dried generalizations, but by judicious comment and illustration endeavors to make the distinctions and relations between words interesting and living as well as clear. The quotations from authors are a noteworthy feature of the book. They are numerous enough to illustrate all the important distinctions, yet every passage is selected with care, not simply with reference to the illustration in question, but also because it is an example of forcible writing.

The derivation of words is given wherever necessary to an understanding of their fundamental meaning; but this feature of the work is not allowed to overburden it.
