

INDEX

- absolute test, relative vs. 4, 8, 118
- acceptance of comments, subconscious 142
- agreement of code and comments 142
- airplane weight program 43
- algorithm, choice of 5, 74, 130, 134
- algorithm complexity 135
- algorithm, inefficient 5, 13, 49, 70, 116, 129
- AMAX1** function 8
- ambiguity, **IF-ELSE** 45
- ambiguity, operator precedence 14, 21, 102
- AMIN1** function 9
- ANSI Fortran Standard 6, 15
- ANY** function 84
- appropriate data representation 20, 47, 53, 63, 74, 90, 97, 127
- appropriate modularization 24, 62, 63, 77, 95, 150
- arguments, function 3, 62, 72, 96
- arithmetic **IF** statement 16, 131, 132, 145
- arithmetic, mixed-mode 6, 104
- arithmetic statement function 12
- array bounds, reference outside 51, 85, 106, 112
- assembly language 3
- assembly language, recoding in 138
- asterisk subscript 88
- asymptotic correctness 113
- ATAN** function 12
- average-computing program 113
- avoiding **GOTO**'s and labels 9, 17, 18, 19, 31, 35, 39, 108, 150
- avoiding special cases 112, 126, 130, 131
- bad code, commenting 44, 45, 143, 144
- bad code, patching 71, 110
- bad data, identifying 87, 91
- Basic 3
- BEGIN-END** statement 31
- binary, decimal to 12
- binary search program 107, 110
- blank-counting program 10
- Boolean operators 20
- boundary condition error 43, 50, 112, 125
- boundary condition testing 112
- bowling program 36, 145
- branch, multi-way 37
- branch on equality, wrong 107, 125, 142
- branches after **IF** 17, 31
- branching around branches 3, 18, 32
- bug, performance 13, 136
- built-in functions 9, 10
- bushy decision trees 47
- CASE** statement 37
- centralized input and output 97
- change, ease of 2, 12, 25, 28, 90, 123, 128, 155
- change-making program 48
- character input function, **READCH** 97
- checker-playing program 60
- choice of algorithm 5, 74, 130, 134
- clarity before efficiency 11, 130
- cleverness 1, 10, 73, 102, 123
- Cobol 3
- code and comments, agreement of 142
- color-counting program 86
- combining logical operators 20, 21
- commenting bad code 44, 45, 143, 144
- commenting variables 150
- comments, agreement of code and 142
- comments, excessive 104, 151
- comments, incorrect 70, 88, 142, 143, 151
- comments, subconscious acceptance of 142
- comments, useless 142
- comparing **LOGICAL** variables 19
- comparisons, sorting run-time 133, 134, 135
- compilation, separate 59
- compiler, debugging 105
- compiler, outsmarting the 11, 127
- complexity, algorithm 135
- complexity, program 16, 76, 95
- composite design 77
- computational complexity 130
