

Table 8: Defintion of locus types

Generic Type	Complete Type	Meaning
P		Linear text in paragraphs
	P0	Normal left-justified text
	P1	Normal paragraph text that is significantly away from the left, typically due to a drawing, or some other text to its left.
	Pb	A free-floating set of lines in a non-standard location.
	Pc	A roughly centred line (compared to the previous line)
	Pr	A (roughly) right-justified line
	Pt	A right-justified 'title' which is on the same line as the previous item
L		Short piece of text, a word, or a character that is anywhere on the page. Mostly these are the so-called labels
	L0	It is not clearly near any drawing element
	La	A label of an astronomical or cosmological drawing element, which is not a star or a zodiac element
	Lc	A label of a container in the pharmaceutical section
	Lf	A label of a fragment of a herb in the pharmaceutical section
	Ln	A label of a nymph in the biological section
	Lp	A label of a large herb or plant drawing (in the herbal section)
	Ls	A label of a star
	Lt	A label of a tube or a tub in the biological section (essentially everything that is not a nymph)
	Lx	Extraneous writing (e.g. in the margin)
	Lz	A label of a zodiac element
C		Text along the circumference of a circle
	Ca	The text runs anti-clockwise
	Cc	The text runs clockwise
R		Text along the radius of a circle
	Ri	The text runs outside to inside (inwards)
	Ro	The text runs inside to outside (outwards)
